

# Automatic Packaging Systems

## APS-2 & APS-4

Our packaging systems allow the user to satchet flat products such as cleaning cards, telephone cards, greetings cards, CD/DVD & A4 documents plus various intermediate sizes\*.

We can also supply liquid injection modules to add fluids such as perfume, IPA and chemicals into the satchets.

The products are sealed between two layers of foil, which can be made from a range of substrates such as polypropelene, paper & metallic laminates.

The systems feature many optional extras such as foil registration mark detection, for both top and bottom foils, to ensure printed information is correctly aligned. Personalised seal blades featuring text or company logos for additional security & advertising purposes. Numbering system to identify products individually or by batch. Output stacker to allow the operator to easily inspect, collect and pack the satchets.

# Technical Data

## APS-2

### *Features:*

Flat pack size from 16x16 to credit card\*

Automatic product feeder\*\*

Variable packet length

Different top & bottom foil capability

Hand feed option

Stacking output conveyer

### Dimensions:

Height: 1630mm, Width: 1910mm, Depth: 1250mm, Weight: 300Kg

### *Optional Extras:*

Batch counter

Variable packet string counter

Easy tear notch cutter

Personalised security seals

Perforating guillotine

Foil registration system

Liquid injection system (metered or dip)

Batch number / date stamper

## APS-4

### *Features:*

From credit card to A4 product handling\*

Automatic product feeder\*\*

Variable packet length

Different top & bottom foil capability

Hand feed option

Stacking output conveyer

### Dimensions:

Height: 1630mm, Width: 1960mm, Depth: 1550mm, Weight: 550Kg

### *Optional Extras:*

Batch counter

Variable packet string counter

Easy tear notch cutter

Personalised security seals

Perforating guillotine

Foil registration system

Liquid injection system (metered or dip)

Batch number / date stamper
