

# Personalisation System

## PPS-2

Our personalisation system can be used to apply numbers / data to flat products such as cleaning cards, telephone cards, greetings cards, CD/DVD & A4 documents plus various intermediate sizes\*.

The system may also be fitted with extra modules to apply secondary processes to the product such as; scratch off panels, hot foil stamping and secure information encoding (rf or magnetic stripe).

One or more cameras can be fitted to the system\*\* to monitor quality of printed information or orientation. These can reduce the amount of scrap produced and assist in keeping your production efficient and maintained high quality.
