

Wrapping Systems

WRS-2, WRS-3, WRS-0

The Datum card wrapping systems have been designed to be suitable for flow wrapping CR80 sized products.

The simplicity of their use makes them ideal for wrapping telephone pre-paid or top up cards.

There are many optional extras that can be fitted to the WRS range of machines to add security and traceability of your products. These machines seal the products between two layers of foil, on all four edges which leaves the packet flat and both sides of the product are visible. It is possible to use printed or opaque foils for added security or advertising. A further option is to use differing foils for the front & back of the packet.

Further security can be added by having customised sealing blades which can feature wording or logos of your choice.

The production speeds of the WRS-2 and WRS-3 make them ideal partners to our CTS-2 and CTS-3 machines respectively. For customers who require to wrap a range of product sizes (up to A4), the APS-2 and APS-4 machines would be suitable (see separate datasheet).

Technical Data

WRS-2

Features:

Automatic Friction Feeder

Adjustable Packet Length

Upto around 85 c.p.m**

Stacking Output Conveyer

Operator Adjustable Drum Temperatures

Dimensions:

Height: 1640mm, Width: 2620mm, Depth: 850mm, Weight: 250Kg

Optional Extras:

Batch Counter

Double Card Detection System

Insert Assist Feeder

Foil Registration System

Personalised Cross Seal Blade Set

Perforated Card String Generator

Extended Card Table

Notch Cutter

WRS-3

Features:

Automatic Friction Feeder

Adjustable Packet Length

Upto around 180 c.p.m**

Stacking Output Conveyer

Operator Adjustable Drum Temperatures

Dimensions:

Height: 1640mm, Width: 3120mm, Depth: 850mm, Weight: 300Kg

Optional Extras:

Batch Counter

Double Card Detection System

Insert Assist Feeder

Foil Registration System

Personalised Cross Seal Blade Set

Perforated Card String Generator

Extended Card Table

Notch Cutter

WRS-0

Features:

Upto 20 cards per pack

Adjustable Packet Length

Upto around 35 p.p.m**

Stacking Output Conveyer

Operator Adjustable Drum Temperatures

Dimensions:

Height: 1640mm, Width: 2500mm, Depth: 850mm, Weight: 250Kg

Optional Extras:

Batch Counter

Single Foil Registration System

Personalised Cross Seal Blade Set

Extended Card Table

Notch Cutter
